Lead is highly toxic and especially damaging to children - impairing how they learn, grow and behave. No level is safe. In 2017, California passed a law requiring all schools to test for lead by summer of 2019. Nearly half of schools are still missing results as of March 2019. Among those tested so far, one-third of school districts had a school with lead levels at more than 5 parts per billion (ppb) - five times the level that should require action, according to the American Academy of Pediatrics. Below are the schools have reported lead levels above 5 ppb as of March 2019 in this legislative district:

1. **Del Rey Woods Elementary, Carmel**
2. **Monterey High, Monterey**
3. **Walter Colton, Monterey**
4. **Bay View Academy, Monterey**
5. **Carmel River Elementary, Carmel**
6. **Arthur B Ingham School, Salinas**
